CURRENT LIST of MEDICAL LITERATURE

VOL. 4

April 15, 1943

No. 15

SUBJECT GROUPS ACCORDING TO JOURNALS

- | | |
|--------------------------------------|---------------------------------------|
| 1. Anatomy; Histology | 26. Infectious Diseases; Epidemiology |
| 2. Anthropology; Ethnology | 27. Medicine |
| 3. Archeology; Paleontology | 28. Metabolism |
| 4. Aviation Medicine | 29. Military and Naval Medicine |
| 5. Bacteriology; Parasitology | 30. Miscellaneous |
| 6. Biology; Embryology | 31. Neurology; Psychiatry |
| 7. Bone; Joint; Extremities; Muscle | 32. Nursing |
| 8. Cancerology | 33. Ophthalmology |
| 9. Cardiovascular System | 34. Otorhinolaryngology; Phoniatry |
| 10. Chemistry; Physics | 35. Pathology |
| 11. Dentistry; Stomatology | 36. Pediatrics; Child Welfare |
| 12. Dermatology | 37. Pharmacology; Pharmacy |
| 13. Diagnosis; Clinical Methods | 38. Physiology |
| 14. Dietetics; Foods; Nutrition | 39. Psychology; Mental Hygiene |
| 15. Digestive System | 40. Public Health; Sanitation |
| 16. Endocrinology | 41. Radiology; Phototherapy |
| 17. Forensic Medicine; Toxicology | 42. Respiratory System |
| 18. Genetics; Eugenics | 43. Surgery; Traumatology |
| 19. Gynecology; Obstetrics | 44. Therapeutics |
| 20. Hematology | 45. Tropical Medicine |
| 21. History; Biography; Bibliography | 46. Tuberculosis |
| 22. Homeopathy; Osteopathy, etc. | 47. Urology |
| 23. Hospitals | 48. Venereal Diseases; Sexology |
| 24. Immunology; Serology | 49. Veterinary Medicine |
| 25. Industrial Hygiene; Sociology | 50. Zoology |

Privately published under the auspices of the

MEDICAL LIBRARY ASSOCIATION INC.
and the
FRIENDS OF THE ARMY MEDICAL LIBRARY
Washington, D. C.

Printed in the U.S.A.

NEW BOOKS

Of the approximately 200 new books received by the Army Medical Library each month a few are being chosen, more or less at random, for brief mention here.

BERNHEIM, BERTRAM W. Adventure in blood transfusion. New York, Smith & Durrell, 1942. 182 p.

The story of blood transfusion, which affects the lives of increasing thousands each year, is told in a fascinating manner by a pioneer in the modern application of this means of saving lives in emergencies.

GLASSTONE, SAMUEL AND VIOLETTE GLASSTONE. The food you eat, a practical guide to home nutrition. Norman Okla. University of Oklahoma press, 1943. 277 p.

The spreading of information concerning the basic principles of nutrition is considered to be one of the urgent necessities of the present day. The reasons are presented as to how and why our knowledge of better living through better eating has arisen. From the results of investigations in recent times the simple but fundamental rules for the selection of healthful and nutritious food are described. As an example of the application of this information the authors were able during the period March 1940 to June 1941 to obtain a pleasant and satisfactory diet for two persons at a cost of two dollars each per week. It is believed that this figure might now be about two dollars and a half.

HALL, MARGUERITE F. Public health statistics. New York & London, Paul B. Hoeber 1942. 408 p.

The fundamental principles of the subject are presented and the methods used in the collection, organization, and interpretation of statistical data are described in detail. The book is intended as a text for a basic course in Public Health Statistics and as reference material in health departments.

KAHN, MORTON C. Public health and preventive medicine. London, New York etc. Oxford University press 1942. 2 vols.

Practitioners of medicine are trained to view the patient as a clinical entity, but now it is essential to view a nation, city, town, and family in the same light. The physician must become community minded. This book is intended to supplement text-books, lectures, clinical and field work in public health education. The subject matter is systematically arranged and under each subdivision the known facts are presented in the most concise and orderly manner, and usually in the form of direct positive statements.

MARKOWITZ, MORRIS. Practical survey of chemistry and metabolism of the skin. Philadelphia, The Blakiston co. 1942. 196 p.

A highly condensed account, based on recent literature, of the chemistry of the various organic substances which enter into the composition of animal tissues and fluids.

PARKER, DOUGLAS B. Synopsis of traumatic injuries of the face and jaws. St. Louis, The C. V. Mosby co., 1942. 334 p.

This brief treatise combines the experience gained in a base hospital in France during the first world war and that of nearly thirty years of teaching and practice of maxillofacial surgery, together with the scattered material gathered from the current medical and dental literature. Its purpose is to give dentists more precise information in both first aid care of patients at the scene of the injury and their later more definite surgical treatment.

SPINK, WESLEY W. Sulfanilamide and related compounds in general practice 2d ed. Chicago, The year book publishers, inc., 1942. 374 p.

A presentation of personal observations upon approximately 2000 patients and a review of the experiences of others described in more than eight hundred references to the literature is contained in this revised and completely reset second edition of a practical treatise on sulfanilamide therapy.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year. Address communications to:

1. Anatomy; Histology

Am. J. Anat., 1943, 72: (Mar.)

- SWEEDER, G.K. A study of retrobulbar tissues in experimental exophthalmos in guinea pigs with reference to primary and secondary modifications. 149-69.
- KINGSBURY, B.F. On the so-called laryngeal tonsils of mammals; with special reference to their structure and development in the cat. 171-97.
- ANDREW, W., BROWN, H.M., & JOHNSON, J.B. Senile changes in the liver of mouse and man, with special reference to the similarity of the nuclear alterations. 199-221.
- PARRIS, E.J. The blood picture of athletes as affected by intercollegiate sports. 223-57.
- MC NUTT, C.W., & SAWIN, P.B. Hereditary variations in the vena cava inferior of the rabbit. 259-69.
- ALLEN, E., THOMAS, T.B. ET AL. Differential growth in the ovaries and genital tract near the time of ovulation in rats treated with colchicine. 291-337.

Tr. Am. Micr. Soc., 1943, 62: (Jan.)

- HOFFETT, J.W. A limnological investigation of the dynamics of a sandy, wave-swept shoal in Douglas Lake, Michigan. 1-23.
- WOLFE, D.C. Some details of asexual reproduction in *Pandorina morum*. 24-6.
- MARKELL, E.K. Gametogenesis and egg-shell formation in *Probolitremma californiense* Stunkard, 1935 (Trematoda Gorgoderidae). 27-56.
- HUNNINEN, A.V., & CABLE, R.M. The life history of *Poecotyle atomum* (Rudolphi) Trematoda; Opecoelidae. 57-68.
- LINCICOME, D.R. Observations on the adult of *Arythmorhynchus duocinctus* Chandler, 1935 (Polymorphidae, Acanthocephala). 69-71.
- MORGAN, B.B. The Physalopterinae (Nematoda) of Aves. 72-80.
- BELL, A.W. The vitellogenic function of the chloragog tissue in enchytraeid (oligochaete) worms. 81-4.
- HOPKINS, S.H. The external morphology of the first and second moulting states of the blue crab, *Callinectes sapidus* Rathbun. 85-90.
- TARVER, O.E., & GRIFFITHS, J.T., JR. Multinucleate hemocytes in the roach, *Blatta orientalis*. 91-3.
- GOLOSMITH, J.B. A simple method for differential staining of fecal smears containing protozoan parasites. 94.
- MOER, J.L. Counterstains for silver impregnations of Golgi apparatus. 96.

5. Bacteriology; Parasitology

J. Bact., Balt., 1943, 45: (Feb.)

- STUART, C.A., WHEELER, K.M. ET AL. Biochemical and antigenic relationships of the paracolon bacteria. 101-19.
- WALLICK, H., & STUART, C.A. Antigenic relationships of *Escherichia coli* isolated from one individual. 121-6.
- JOHNSON, E.A., & RETTGER, L.F. A comparative study of the nutritional requirements of *Salmonella typhosa*, *Salmonella paratyphi* and *Salmonella gallinarum*. 127-38.

- DOWNES, C.M. The effect of bactericidal agents on gram-negative cocci. 137-42.
- MORTON, H.E., & ANDERSON, T.P. The morphology of *Leptospira interrogans* and *L. canicola* as revealed by the electron microscope. 143-6.
- HARRIS, A.H. Experiments with collodion sacs on inhibition of bacterial growth in vitro. 147-54.
- GUNSALES, I.C., & SHERMAN, J.M. The fermentation of glycerol by streptococci. 155-62.
- BAIRDEN, L., & YERIAN, D. The destruction of acid-fastness of the tubercle bacillus by an autolytic process. 163-6.
- PACHARNIAN, A. An animal board for rabbits, monkeys, and other laboratory animals. 167-76.
- BRONSON, L.H., & PARKER, R.F. The inactivation of the virus of infectious myxomatosis by heat. 177-81.
- UNDERKOFER, L.A., BANTZ, A.C., & PETERSON, W.H. Growth factors for bacteria; growth requirements of *Acetobacter suboxydans*. 183-90.
- LEONIAN, L.H., & LILLY, V.G. The unknown factor in the growth of *Saccharomyces cerevisiae*. 191.
- LIVE, I. Studies on the allergic and antigenic activity of sonic filtrates of *Brucella abortus*. 193.
- FLOSDORF, E.W., BONDI, A. ET AL. The antigenic structure of *Hemophilus pertussis*. 193.
- FELTON, H.M., & FLOSDORF, E.W. Clinical results of the use of agglutigen from phase I *Hemophilus pertussis* as a skin test for susceptibility to whooping-cough. 194.
- BONDI, A., JR., FELTON, H.M., & FLOSDORF, E.W. The antigenic structure of *Hemophilus paraptussis* and its probable clinical significance. 194.
- MORTON, H.E. The use of the Syrian hamster as a laboratory animal. 194.
- LURIE, M.B. The effect of promin on experimental tuberculosis in the rabbit. 194.
- ALLURE-WEBER, E. Cultivation of *Hemophilus influenzae* in yolk-sac of developing chick embryo. 195.
- ALLURE-WEBER, E. Chemotherapeutic studies with *Hemophilus influenzae* in mice and chick embryos. 195.
- STARKEY, R.L., & WAKSMAN, S.A. Fungi tolerant to extreme acidity and high concentrations of copper sulfate. 196.
- BRAUN, A.C., & LASKARIS, T. Tumor formation by attenuated crown-gall bacteria in the presence of growth-promoting substances. 196.
- PLASTRIDGE, W.N. Cultivation of a bacteriophage strain of *Trichomonas fetus*. 196.
- JOHNSON, R.D., & FOUSEK, M.D. A study of the spread of *H. influenzae*, type B. 197.
- BOISVERT, P.L., & FOUSEK, M.D. Non-hemolytic variants of hemolytic streptococci. 197.
- BORMAN, E.K., WHEELER, K.M. *Salmonella* typing in a public health laboratory. 198.
- SNELL, E.E. The effect of heat sterilization on the growth-factor activity of pyridoxine for *Streptococcus lactis* B. 199.
- SAVOY, C.M.S., ABERNETHY, J.L., & WILLIAMS, O.B. The relation of structure to anti-septic action of certain chlorinated 4-phenylphenols. 200.
- BECK, O., & COFFEY, W.B. Observations on *Salmonella typhimurium*. 200.
- IRONS, J.V., BOHLS, S.W., & ALBERT, D. Virus-neutralizing antibody content of human sera following equine encephalomyelitis vaccination. 200.

- HAYWARD, A.E. Some physiological factors in spore production. 200.
- MC GREGOR, T., EADS, R.B., & THURMAN, D.C. *Ornithodoros talaje* (Querin-Meneville) a possible vector of relapsing fever in Texas. 200.

MICROFILM COPYING

Army Medical Library
Washington, D.C.

Microfilm copying of the periodical literature of the Army Medical Library was begun by Bibliofilm Service of the U.S. Department of Agriculture in 1936 and continued until September 1940 when an independent service under the auspices of the Friends of the Army Medical Library was established. Due to the expanding needs of microfilm copying for Regular Army and Federal establishments and other calls made upon it in the present emergency, additional equipment and enlarged facilities have been added at public expense. It has now become possible to substitute microfilm copying to a limited extent for interlibrary loans. Microfilms will be sent without charge in lieu of the loan of the books to all accredited medical librarians who prefer them or where books or journals cannot be loaned.

This service should result in a saving for the borrowing librarian since the responsibility for safekeeping and return of the books will be eliminated and no records will be required. The person receiving the microfilm will have no obligation for its return and may retain it for future use.

The total amount of work which can be done on this basis is of course limited by appropriations now available, hence there will be a limitation in the extent of the service, as to quantity. Orders for microfilm copying, except in particular cases, where bulk or commercial work is involved, will not ordinarily be accepted from individuals, but only through libraries, in the same manner as interlibrary loans.

The following postage should be included with each order for microfilm:

Articles totaling up to & including 100 p.	send.... 1½¢
" " " " " 400 p.	" 3¢
" " over 400 p.	send 4 1½¢ stamps... 6¢

Send orders to:
Photoduplication Service
Army Medical Library
Washington, D.C.

NOTE: The above offer refers only to extract copying from periodicals and does not cover making microfilm copies of entire volumes.

Most of the requests which have so far been received have not been accompanied by the postage mentioned above. Since this service replaces inter library loans which are not granted the franking privilege the microfilms can not be mailed out without the proper amount of postage.
